1 For your safety / 为了您的安全

Before use, please ensure that all users comprehensively read, understand, and follow the instructions in this document. / 使用前，请确保所有的用户都已经阅读、理解，并遵循本档内的操作说明。

1.1 Risk levels and alert symbols / 危险级别和警示标志

Safety warnings, safety alert symbols, and signal words in these instructions indicate different risk levels:

▲ DANGER!

DANGER indicates an imminent hazardous situation which, if not avoided, **will result in** death or serious injury.

▲ WARNING!

WARNING indicates a potentially hazardous situation which, if not avoided, **may result in** death or serious injury.

▲ CAUTION!

CAUTION indicates a potentially hazardous situation which, if not avoided, **may result in** minor or moderate injury.

NOTICE

NOTICE explains practices not related to physical injury. No safety alert symbol appears with this signal word.

Note: Provides additional information to clarify or simplify a procedure.

本档内的安全警告、安全警示标志和标识词语指示不同的危险级别：

▲ 危险

危险表示危急、有危害的情景，若不防范，则会导致死亡或严重的伤害。

▲ 警告

警告表示有潜在危害的情景，若不防范，则可能会导致死亡或严重的伤害。

▲ 小心

小心表示有潜在危害的情景，若不防范，则可能会导致中等或较轻的伤害。

提示

注意表示此行为不会导致人身伤害。因此此标识词语中不含警告标志。

注：注意中会提供用于解释或简化工作的额外信息。

1.2 Vital precautions / 重要安全措施

⚠ WARNING!

High voltage! Risk of electric shock and fire!

Short-circuits may entail lethal damage!

Before use, read and follow all valid instructions.

Use solely and exclusively as described in the instructions.

Never open. Never insert objects.

For operation, always use a power source as indicated in the instructions.

Always unplug the power cable by gripping the power plug, not the cable.

Never try to repair. All repair work should be done by a qualified ARRI Service Center.

Never remove or deactivate any safety equipment (incl. warning stickers or paint-marked screws).

Always protect from moisture, cold, heat, dirt, vibration, shock, or aggressive substances.

Never cover any fan openings.

⚠ 危险

高电压！有触电或起火风险！

短路将引起致命危险。

使用之前，请仔细阅读所有未过期的使用说明，并严格遵循。

切勿打开机身。切勿插入任何物体。

操作时，请务必使用说明中指出的电源。

断开电源时请握住电源插头，而不是电线。

切勿尝试自行维修。所有的维修工作必须由具备资质的ARRI 维修中心进行。

切勿移除或毁坏任何安全设施（例如警告贴纸或涂漆标示的螺丝）。

务必避免潮湿、寒冷、炎热、多尘、震动、冲击或严酷的使用环境。

切勿覆盖任何风扇开口。

▲ CAUTION!**Condensation! Risk of electric shock and fire!**

Condensation may form on the sensor and electrical connections when exposing the camera to sudden changes of temperature or humidity!

To avoid injury and damage, never operate the camera when condensation occurs.

▲ 小心**冷凝！有触电或火灾风险！**

当将摄影机暴露于温度或湿度迅速变化的环境中时，影像传感器和电子部件连接处可能会产生冷凝。

为了避免受伤或设备损坏，在冷凝发生时切勿操作摄影机。

▲ CAUTION!**Heavy weight! Risk of injury and damage!**

If placed on an unstable surface, the camera can fall and cause serious harm!

Always place the camera on proper support devices. Safely attach it as described in the instructions.

▲ 小心**设备重量较大！有受伤或设备损坏风险！**

若安置于不稳定的位置，则摄影机可能会掉落，并造成严重的伤害。

务必将摄影机安装于适当的支撑设备上。请按照说明中所描述的方法来安全地安装摄影机。

▲ CAUTION!**Hot surfaces! Risk of injury and damage!**

During extended operation or operation in high ambient temperatures, the fan outlet at the camera rear, the CFast drive and the CFast card can get hot.

Never cover, obstruct or block the fan in- or outlets while the camera is powered.

1.3 General precautions / 般安全措施

NOTICE

Even rugged cameras use components sensitive to improper use.

Always unplug the camera from power sources before making changes to the setup or system (in particular: changing cables).

Direct sunlight can result in camera housing temperatures above 60 °C (140 °F). At ambient temperatures above 25 °C (77 °F), protect the camera from direct sunlight.

Protect the optical system and sensor: Never point the camera or viewfinder into direct sunlight.

Avoid permanent sensor damage: Never let any direct light or reflections from high-energy light sources (e.g. laser beams) enter the camera's optical path.

Protect the sensor: Always keep a lens or protective cap on the empty lens mount. Change lenses in dry, dust-free environments only.

Always clean the sensor cover glass according to ARRI instructions.

Only use the tools, materials and procedures recommended in this document. For the correct use of other equipment, see the manufacturer's instructions.

提示

即使本摄影机非常坚固，也是由敏感的组件所组成的，请谨慎使用。

当改变摄影机安装支撑设备或系统时（特别是更换电缆），请务必断开摄影机电源。

注意保护光学系统和影像传感器：切勿将摄影机或取景器直接面朝直射阳光。

避免对影像传感器造成永久性伤害：切勿让任何来自高能量光源（例如激光）的直射光或反射光进入摄影机的光路系统。

注意保护影像传感器：空镜头卡口上务必安装镜头或保护盖。更换镜头时，务必在干燥、无尘的环境中进行。

请完全并仅按照用户手册中所描述的方法来清洁影像传感器保护玻璃。若清洁不成功，请咨询ARRI维修中心。切勿尝试打开保护玻璃。

清洁影像传感器保护玻璃时，务必遵守ARRI说明书中描述的方法。

仅使用本文档中建议使用的工具、材料和操作方法。若要正确地使用其他设备，请参阅其制造商的说明书。

2 Audience and intended use

NOTICE

The product is solely and exclusively available for commercial costumers and shall be used by skilled personnel only. Every user should be trained according to ARRI guidelines.

Use the product only for the purpose described in this document. Always follow the valid instructions and system requirements for all equipment involved.

The ALEXA Mini is a 35 mm digital camera solely and exclusively for recording images at various resolutions suitable for a variety of distribution formats:

- ProRes 422, ProRes 422 HQ, ProRes 4444, ProRes 4444HQ, and RAW* codecs
- REC 709 encoding (through use of look files), Log C or RAW* encoding
- CFast 2.0 card recording
- Up to 200 fps with full image quality
- 35 mm CMOS sensor in 16:9 or 4:3* modes
- Small and lightweight built for high mobility and special applications

* Not supported upon initial release. For SUPs beyond 2.5, please check the corresponding release notes.

3 Scope of delivery and warranty

NOTICE

Product and packaging contain recyclable materials. Always store, ship, and dispose of according to local regulations.
ARRI is not liable for consequences from inadequate storage, shipment or disposal.

Delivery

On delivery, please check if package and content are intact. Never accept a damaged/incomplete delivery. A complete delivery includes:

- ALEXA Mini camera with lens mount according to order: titanium PL, AMIRA PL, EF
- Antenna
- USB memory stick
- 3 mm Allen key
- Quick Guide
- Original packaging incl. drying agent

NOTICE

ARRI offers an increasing variety of product bundles and additional accessories.
For details, please consult our website or your local ARRI Service Partner.

Warranty

For scope of warranty, please ask your local ARRI Service Partner. ARRI is not liable for consequences from inadequate shipment, improper use, or third-party products.

4 Camera layout

Right

- 1 Fan intake
- 2 LBUS connector
- 3 integrated WiFi antenna
- 4 I/O panel

Left

- 1 Function button
- 2 Camera buttons 1-3
- 3 Recording button
- 4 Status LED

Top

- 1 MAP-1
- 2 MVB-1
- 3 MVF-1 buttons
- 4 Record button

Bottom

- 1 MVF-1 type label
- 2 PLAY button
- 3 Camera type labels
- 4 LBUS connector

Front

- 1 RMB-3
- 2 Lens mount (here: PL)
- 3 LBUS connector
- 4 Audio connector

Back

- 1 Fold-away monitor (MVF-1)
- 2 OLED eyepiece
- 3 Timecode connector
- 4 White radio antenna
- 5 I/O panel
- 6 Media panel (CFast 2.0 card slot, USB)
- 7 Ethernet connector
- 8 Boot status LED
- 9 Power button
- 10 Recording status LED
- 11 Fan outlet

⚠ CAUTION!

Hot surfaces! Risk of injury and damage!

During extended operation or operation in high ambient temperatures, the fan outlet at the camera rear, the CFast drive and the CFast card can get hot.

Never cover, obstruct or block the fan in- or outlets while the camera is powered.

4.1 Product identification

The FCC conformity label and the CE type label with serial number (1) are on the camera bottom.

5 Power supply

The camera power is supplied by external power sources only.

NOTICE

If the power supply is interrupted with the camera switched on, the camera will automatically repower and boot-up on reconnection.

Use the 8-pin LEMO connector and a KC50-S or KC50-SP-S cable to supply the camera with 10.5 to 34 V DC.

6 Switching on/off

NOTICE

Before switching on, ensure that the camera is connected to an external power source.

The power button background illumination is on when the power is in the valid range.

To switch on the camera:

- ▶ Press the power button (1).

The camera starts booting. The boot status is indicated as follows:

Boot status LED (2) is...	Camera
flashing blue	is booting
solid blue	has finished the boot process

For mounted MVF-1 only: During the boot process, the ARRI logo appears in the monitor of the MVF-1 (4).

To switch off the camera:

- ▶ Press and hold the power button (1) until the camera has switched off and the boot status LED (2) turns off.

For mounted MVF-1 only: On the monitor of the MVF-1, a countdown appears. On reaching zero, the camera switches off.

To check the recording status

The recording statuses are indicated as follows:

Record status LED (3) is...	Camera is...
solid green	ready for recording
solid red	recording
off	not ready for recording. Check, if the CFast 2.0 card is valid. If not: Insert a valid CFast 2.0 card. See page 54.
flashing green/red alternately	not ready for recording due to an error. Reboot camera.

NOTICE

The recording statuses are also visible in the home screen, the live screen, the EVF image, and the SDI image.

7 Connectors

NOTICE

Connecting or disconnecting devices or cables while recording can disturb the audio/image signal due to static electricity.

7.1 Front connectors

Audio in (5-pin LEMO)

2-channel line level audio input.

LBUS (4-pin LEMO)

LBUS output for daisy-chainable active lens motors.

7.2 I/O panel

NOTICE

If the power supply is interrupted with the camera switched on, the camera will automatically repower and boot-up on reconnection.

- | | | | |
|---|------------------------|---|--------------------|
| 1 | Timecode connector | 5 | BAT main power in |
| 2 | White radio antenna | 6 | EXT connector |
| 3 | MVF-1 | 7 | Ethernet connector |
| 4 | HD-SDI image out 1 & 2 | | |

TC (5-pin LEMO)

The TC connector is a 5-pin LEMO socket. It accepts and distributes LTC (Longitudinal Time Code) signals.

White radio antenna

Mounting point for white radio antenna for lens control.

NOTICE

Do not leave the antenna connector open during operation or transport. The radio module inside could be damaged by electrostatic discharge on the open connector. ARRI recommends using the originally supplied antenna only (order number: K2.0001996).

EVF (16-Pin LEMO)

Hot swappable interface for MVF-1.

SDI OUT 1 & 2 (BNC)

Both BNC outputs deliver image outputs in 1920 x 1080 422 1.5G, 422 3G, 444 3G and 422 6G* single link formats. Through a hardware modification, SDI 2 can be reconfigured into an SYNC/RET IN connector. Please contact an ARRI camera service center for more information.

*Only on SDI 2 in UHD recording format

BAT (8-pin LEMO)

Via cables KC50-S (2 m, straight) and KC50-SP-S (coiled), this main power supply input accepts 10.5 to 34 V DC.

EXT (7-pin LEMO)

A connector for external accessories, carrying two CAN buses and accessory power output at camera voltage level (1.0 A max.). With an external adapter, R/S functionality is supported.

ETH (10-pin LEMO)

Standard Ethernet connectors don't deliver the durability and reliability required by ARRI, so ALEXA Mini uses a 10-pin LEMO connector. A special cable, available from ARRI (model KC-153-S), is required to connect the Ethernet connector to a standard RJ-45 Ethernet connector.

7.3 Media panel

- | | | | |
|---|---------------------|---|-----|
| 1 | Status LED | 3 | USB |
| 2 | CFast 2.0 card slot | 4 | Lid |

Card (CFast 2.0)

Storage media slot for CFast 2.0 recording cards.

USB

Interface for USB memory sticks with FAT file system. Can also be used to charge USB devices.

7.3.1 Preparing a USB memory stick

USB memory sticks for the ALEXA Mini must have a specific folder structure which can be created with the camera.

1. To prepare a USB memory stick: Open the media lid (1).
2. Connect a FAT-formatted USB stick (3) to the camera (2).
3. From the home screen, navigate to *Menu > Media > Prepare USB medium*.
4. Press *CONFIRM* to prepare the folder structure.
5. The USB stick (3) is now ready for use with the camera.
6. **Note:** To avoid file corruption, never remove the USB stick during write access.
7. You can remove the stick from the camera without unmounting.

7.3.2 Changing a CFast 2.0 card

NOTICE

ALEXA Mini does not accept ALEXA-formatted CFAST 2.0 cards, and vice versa. Before using a CFAST 2.0 card with ALEXA Mini, you must erase it in-camera to create the required file system

Avoid damage to the contacts of both camera and card. Always insert cards as described in this document.

Never change memory cards when recording - this may damage the recorded clip.

1. Open the lid (1).
2. Align the card's positive edge (3) facing the camera rear.
3. With the contact pins first, gently insert the card, until it audibly locks (2).
4. Gently close the lid (1). **Never** force it closed on an unlocked card.

5. **For card removal:** Open the lid (1).
6. Push the card in until it audibly unlocks (2).
7. Remove the card.

8 Lens mount/filters

1 Lens mount (here: PL)

8.1 *ND* filter module

The camera contains an internal ND filter module, consisting of ND 0, 0.6, 1.2 and 2.1 filters. The filters can be operated via user buttons or the MVF-1.

8.2 Changing a lens

NOTICE

Protect the sensor: Always keep a lens or protective cap on the empty lens mount.
Change lenses in dry, dust-free environments only.
Never exceed the maximum lens dimensions.
Have every lens properly shimmed as prescribed by the manufacturer.

PL mount

Note: Please use a lens support system for EF lenses above 3 kg/6.6 lbs.

1. Observe maximum lens dimensions (see User Manual).
2. Unlock the lens mount counter-clockwise (1) and remove the lens or cap.
3. **Never** touch the sensor.
4. Either: Mount the next lens and lock (2) the lens mount clockwise.
5. Or: Always cap and lock (2) an empty lens mount clockwise.

EF mount

Note: Please use a lens support system for EF lenses above 3 kg/6.6 lbs.

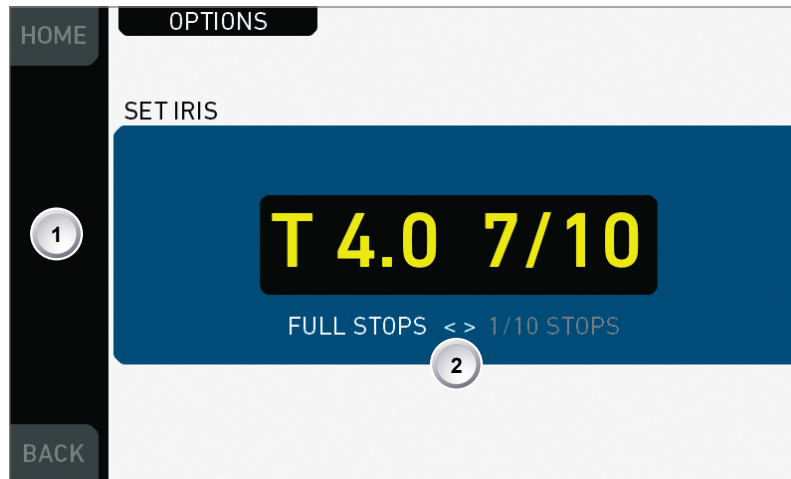

1. Observe maximum lens dimensions.
2. Turn the lever counter-clockwise (1) to unlock the mount.
3. Either: Remove the cap.
4. Or: Press and hold the button (2) to unlock the lens.
5. Turn the lens (3) counter-clockwise, then remove it.
6. **Never** touch the sensor.
7. Either: Mount the next lens:
 - Align the dots of both lens and lens mount.
 - Push the lens into the mount.
 - Turn the lens clockwise (5) until the bayonet locks.
 - Turn the lever clockwise (4) to tighten the lens to the lens mount.
8. Or: Always cap the empty lens mount.

8.3 Lens control

Control of lens iris is possible with ENG PL mount and EF lenses. You can control the iris manually, via user button, or via auto iris.

8.3.1 Manual iris adjustment

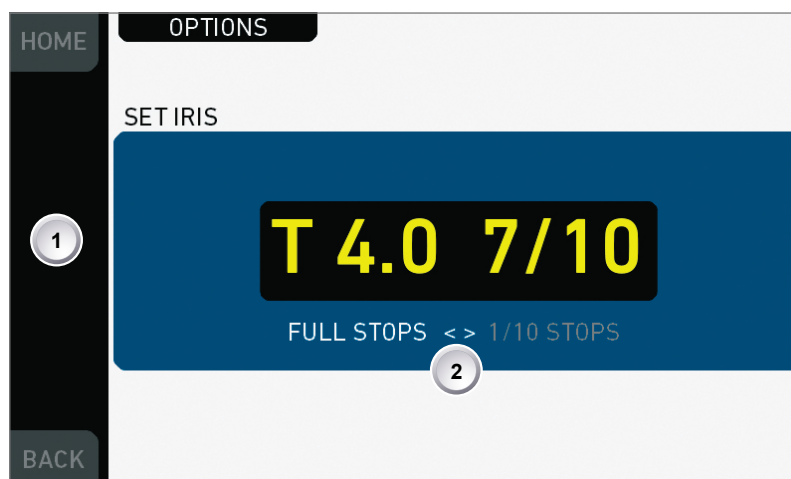

HOME > EI > IRIS

Pressing the wheel (1) changes the step size between full and sub-stops (2). **Note:** Sub-stop precision depends on the lens type and is automatically set by the camera.

On the live screen, you can activate and deactivate iris adjustment (1) by short-pressing the lower round (not oval!) button (2). Keeping the button pressed (2) activates iris adjustment until it is released. (2). **Note:** Depending on the image flip, the round buttons may appear on the right.

Pressing the wheel (1) changes the step size between full and sub-stops (2). **Note:** Sub-stop precision depends on the lens type and is automatically set by the camera.

8.3.2 Iris control via user button

MENU > User button > Button X

For iris control, assign one user button each with *Open Iris* and *Close Iris*. See "MENU > User buttons".

8.3.3 Auto iris

HOME > EI > IRIS > OPTIONS

Via jogwheel (1), you can define the auto iris behavior.

Auto iris mode: Defines the iris calculation:

- *Integral*: Iris is calculated based on full image content.
- *Center*: Iris is calculated with higher priority on image center.

Auto iris offset: Corrects the auto iris calculation result by up to +/- 3 stops in 1/3 stop step sizes. Activate via user button.

9 Camera controls

- 1 Function button with status LED
- 2 Camera buttons 1-3 with status LEDs
- 3 Recording button
- 4 Recording status LED

9.1 Function button FN and camera buttons 1-3

Camera buttons as user buttons:

By default, the camera buttons 1-3 function as user buttons.

1. In the camera menu (MENU > Camera user buttons), set the desired functions to the user buttons.

The functions are assigned to the user buttons.

2. Press a user button (2) to trigger its function.

Depending on the assigned user button function, the LED reflects the function state.

Camera buttons to control standard camera functions:

- Press and hold the function button (1); then press a camera button (2). If a simultaneous press cannot be performed, the FN button can be pressed twice within 0.5 seconds to bring the camera buttons into function selection mode for 2 seconds. During these two seconds, pressing a camera button will de-/activate its assigned function.

The LED of the FN button reflects that a standard function is active. An LED on each button reflects the functional status.

The following standard functions can be triggered:

Function button & camera button	Function								
1	Toggles the overlay menu of the Live view. In the overlay menu, the camera buttons control the following functions: <table border="1" data-bbox="726 813 1396 1086"> <thead> <tr> <th>User button</th> <th>Function</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Select Backward</td> </tr> <tr> <td>2</td> <td>Select Forward</td> </tr> <tr> <td>3</td> <td>Confirm</td> </tr> </tbody> </table>	User button	Function	1	Select Backward	2	Select Forward	3	Confirm
User button	Function								
1	Select Backward								
2	Select Forward								
3	Confirm								
2	n.a.								
3	Starts/stops the playback. During playback, the camera buttons control the following functions: <table border="1" data-bbox="726 1265 1396 1536"> <thead> <tr> <th>User button</th> <th>Function</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Skip Backward</td> </tr> <tr> <td>2</td> <td>Skip Forward</td> </tr> <tr> <td>3</td> <td>Play/Pause</td> </tr> </tbody> </table>	User button	Function	1	Skip Backward	2	Skip Forward	3	Play/Pause
User button	Function								
1	Skip Backward								
2	Skip Forward								
3	Play/Pause								

9.2 Recording button

NOTICE

Pressing a recording button returns the user interface to the home screen and disables the menu access.

Recording also disables the *US* switch and the home screen buttons for *FPS*, *TC*, *Shutter*, and *Look* settings.

To start recording:

Prerequisite: The camera is prepared.

1. Preset all buttons.
2. Press *REC* (1) on the left camera side.

The camera starts recording. The recording status LED (2) reflects the recording status:

Recording status LED (2) is...	Camera is...
solid green	ready for recording
solid red	recording
flashing red	Recording starts/stops
off	not ready for recording. Check if the CFast 2.0 card is valid. If not: Insert a valid CFast 2.0 card. See page 54.
flashing green/red alternately	not ready for recording due to an error.

3. **For mounted MVF-1 only:** Press REC (1) on the MVF-1:

**NOTICE**

Never change memory cards when recording - this may damage the recorded clip.

NOTICE

Connecting or disconnecting devices or cables while recording can disturb the audio/image signal due to static electricity.

10 MVF-1 controls

- | | | | |
|---|----------------------|----|------------------|
| 1 | Monitor (Live & GUI) | 7 | Monitor button |
| 2 | Peaking button | 8 | Proximity sensor |
| 3 | Exposure tool button | 9 | Diopter control |
| 4 | VF-1 user button | 10 | Screen buttons |
| 5 | VF-2 user button | 11 | Jogwheel |
| 6 | Recording button | | |

Proximity sensor

This infrared sensor automatically deactivates the MVF-1's internal OLED panel when you withdraw your eye. The sensor is placed either on the bottom left-hand side of the viewfinder (Generation 1), or it is integrated in the eye cup (Generation 2).

The Alexa Mini MVF-1 contains the generation 2 proximity sensor.

NOTICE

To avoid hardware damage, always keep the sensor unobstructed.

10.1 EVF image/monitor

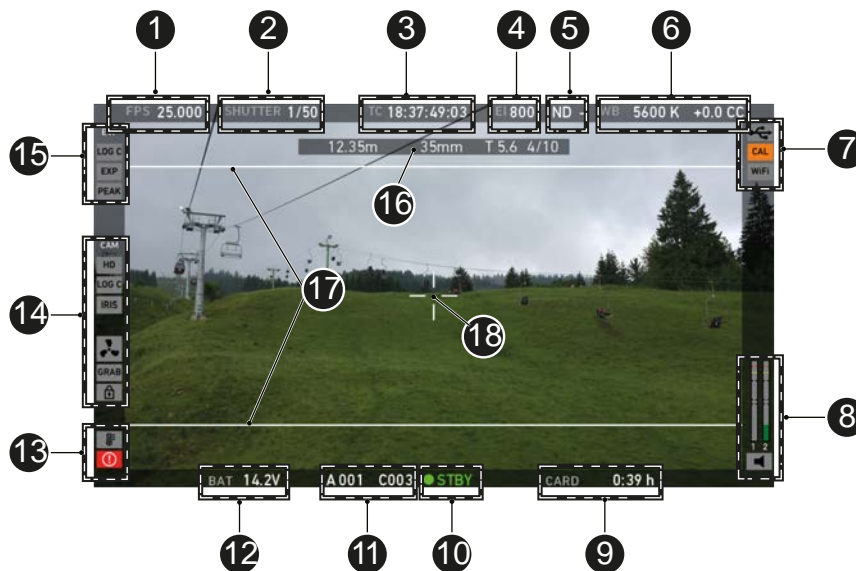

When you look through the eyepiece, the proximity sensor (3) activates the EVF display (2).

You can add status data from the home screen (1) to the MVF-1 image (2).

If activated, overlays around the EVF image show essential camera, audio, and recording statuses.

You can modify/deactivate these status bars via the *EVF overlays* and *EVF status components* menu. For more details, see the User manual.

Note: In *Overlay* mode (see below), all status bars appear on the active MVF-1 image.

- | | | | |
|---|---|----|---|
| 1 | Sensor FPS | 10 | Camera status |
| 2 | SHUTTER value | 11 | Reel and clip info |
| 3 | TC Timecode (if enabled) | 12 | BAT level/status |
| 4 | EI Exposure index | 13 | Alert and temperature status |
| 5 | Internal ND filter | 14 | Camera settings icon (Rec format, Rec gamma, Iris, Fan status, Framgrab, Camera lock) |
| 6 | WB White balance | 15 | EVF image status (EVF gamma, EVF exposure tool, EVF peaking) |
| 7 | Icons for USB status, lens motor calibration request, WiFi status | 16 | LDS info |
| 8 | Audio status | 17 | Framelines |
| 9 | CARD capacity/status | 18 | Center mark (here: cross) |

1 Safe mode

In *Safe mode*, all status bars appear in a black frame (1) **outside** the active MVF-1 image.

Note: If surround view is active, the area is marked by a surround mask.

10.2 PK peaking button

1. To activate peaking on monitor (1) and MVF-1 (3): Press *PK* (2).
2. Peaking highlights the image parts that are in focus for better focus judgement.
3. For *PK* settings: Go to *MENU > Monitoring > EVF/Monitor > Peaking*.

10.3 EXP exposure tool button

The *EXP* button (2) activates the set exposure tool on the monitor (1) and EVF image (3). Use the tool for evaluation of the image exposure levels. An activated tool lights up the button (2).

For *EXP* setting: Go to *MENU > Monitoring > EVF/Monitor > Exposure tool*.

In *Zebra* mode, the tool overlays up to two luminance ranges with diagonal stripes. *High zebra* ranges above, *Mid zebra* around the user-defined luminance value.

False color mode overlays predefined luminance ranges as follows:

Luminance range	Signal level	Color
White clipping	100 to 99 %	Red
Just below white clipping	99 to 97 %	Yellow
One stop over medium gray (Caucasian skin)	56 to 52 %	Pink
18 % medium gray	42 to 38 %	Green
Just above black clipping	4.0 to 2.5 %	Blue
Black clipping	2.5 to 0.0 %	Purple

10.4 VF1 & VF2 user buttons

- ▶ Via the camera menu, you can assign a function to both *VF-1* and *VF-2* buttons (1). For details, see the user manual.

10.5 *PLAY* button

1. Press *PLAY* (1) for one second to see the last clip of the active CFast 2.0 card.
2. To leave playback: Press *PLAY* (1) for one second.
3. Or: Press the EXIT screen button.
4. To select other clips, use the on-screen navigation. For details, see the User Manual.

10.6 Diopter adjustment

- ▶ Twist the ring left or right for diopter adjustment (1).

10.7 Adjusting the monitor

- ▶ Fold (1), swivel (2) and flip (3) the monitor according to your needs.

10.8 Changing the monitor mode

1. To change the monitor mode between live view and user interface: Press M (1).

2. In live mode, toggle the status bar content (1) via the lower buttons.

3. Via the camera menu, you can activate a location sensor that automatically flips the user interface to match a left- or right-sided monitor position (3).
4. **Note:** the jogwheel (1) and the screen buttons (2).

10.9 Live monitor

Below the camera live image, the live screen shows image and camera status. You can toggle the bar's content via the left or right oval button below. The center oval button returns you to the main status bar.

Note: The following status bar signals a standby camera with a 25.000 fps sensor rate, a 180 ° shutter angle, a 5,600 K white balance (daylight yellow) with +0.0 color compensation, a 160 ISO exposure index, and a 0.6 ND filter.

- | | | | |
|---|--|----|-------------------------------|
| 1 | Surround mask | 6 | Exposure index |
| 2 | Camera temperature warning (warning=red) | 7 | White balance |
| 3 | ALERT message | 8 | Shutter value (° or sec) |
| 4 | Center mark | 9 | Sensor frame rate |
| 5 | Active ND filter | 10 | Camera status (here: Standby) |

Surround mask

This grayed-out frame marks all non-recorded parts of the sensor image. Can be deactivated.

If surround view is active, the non-recorded area is masked. Style options are: Black line, colored line, or semitransparent mask (as shown here).

Center mark

Marks the image center. Can be set to *Off*, *Cross*, *Dot* or *Small Dot*.

10.10 User monitor

Screen buttons and jogwheel

There are eight screen buttons, four above (2) and four below (3) the display (4). Their function depends on the screen content (4) and is labeled directly above or below each button.

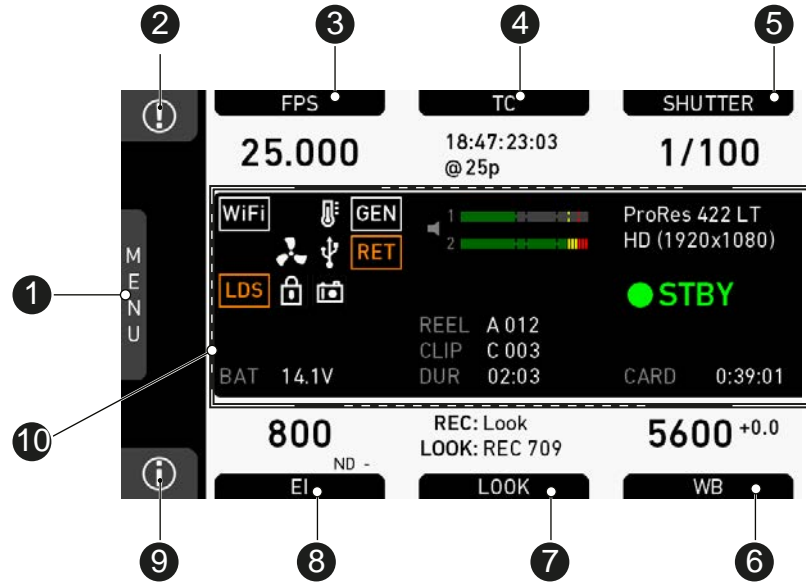

Unlabeled buttons have no function for that screen. A grayed-out label means: function currently not available. Via jogwheel (1), you can:

- Scroll or navigate through lists and menus.
- Change values (by scrolling up or down).
- Confirm settings (by pressing the wheel).

On the home screen (4), pressing the jogwheel (1) opens the camera menu.

Home screen

The home screen gives access to essential camera parameters and statuses. Oval screen buttons and a jogwheel allow quick parameter editing. To return to the home screen from any other screen: Press *HOME*.

- | | | | |
|---|----------------------|----|----------------|
| 1 | MENU jogwheel | 6 | WB button |
| 2 | ALERT message button | 7 | LOOK button |
| 3 | FPS button | 8 | EI button |
| 4 | TC button | 9 | INFO button |
| 5 | SHUTTER button | 10 | Status section |

Note: The switch icons for *WB* and *EI* (6 and 8) are permanent. For *FPS*, *SHUTTER* and *LOOK* (3, 5, 7), the switch icon only shows for the function that is assigned to the *US* user switch. For full instructions, see the User Manual.

MENU jogwheel

Press the jogwheel to enter the camera menu.

ALERT message button

If red: Alert messages are available (critical to camera functionality). Press the round button to read them.

FPS button

FPS shows the sensor frame rate, allowing adjustments from 0.750 to 100.000 (200.000 with valid license).

Note: The switch icon in the black label only shows if the *US* user switch is set to *FPS*.

Note: If sensor fps does not match the project rate, the *FPS* label turns orange and shows an exclamation mark.

TC button

Shows the current Timecode values and the active project rate, allows adjustment of *TC* formats and values.

SHUTTER button

Shows shutter settings adjustable either as angle (5.0 to 356.0 °) or exposure time (1/1 to 1/8000 s).

Shutter angle, sensor rate and exposure time relate as follows: $\text{Exp time} = \text{Shutter angle} / (360 * \text{fps})$.

Note: The switch icon in the black label only shows if the *US* user switch is set to *SHUTTER*.

INFO button

Provides access to the camera info screens.

EI button

Shows the current *EI* rating and active ND filter value. Allows you to set the exposure index in ASA.

Base sensitivity for the ALEXA Mini is 800 ASA. The *EI* rating can be adjusted from 160 to 3200 ASA.

Note: ASA and ISO ratings are identical.

LOOK button

Shows the REC path gamma setting and the name of the active look. Opens the look screen, which provides further access to gamma settings of all image paths and global look.

Note: The switch icon in the black label only shows if the *US* user switch is set to *LOOK*.

WB button

WB shows the camera's current white balance (= preadjusted color temperature of a light source).

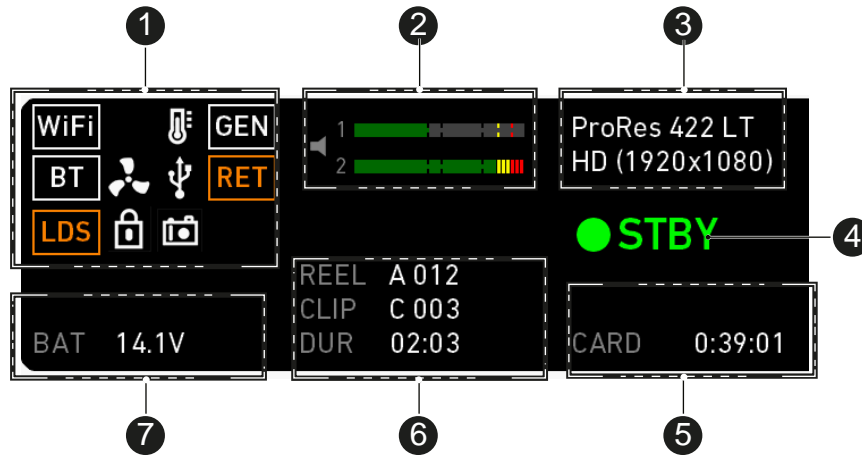

You can adjust WB from 2,000 to 11,000 Kelvin (here: 5,600) in steps of 10 K for red/blue correction.

Also, you can color-compensate for green/magenta tints in a range from -16.0 to +16.0. Positive or negative CC color compensation values then appear in superscript (here: +0.0).

For automatic white balance: Press AW (on operator panel) twice within one second. This stores the auto-white balance result in the currently active switch position.

10.10.1 Status section

The status section on the home screen shows key data on recording, voltage, lockings, etc.:

- | | | | |
|---|------------------|---|------------------|
| 1 | Status icons | 5 | Card status |
| 2 | Audio meters | 6 | Recording status |
| 3 | Codec/resolution | 7 | Battery voltage |
| 4 | Camera status | | |

WiFi, BT and LDS icons

WiFi: Camera WiFi is active.

BT: Camera Bluetooth is active.

LDS: Indicates an error on the LDS interface.

Humidity icon

Indicates an active High Humidity mode (see *MENU > System > Sensor > Sensor temperature*)

Temperature icon

Alerts on sensor temperature issues:

- Black: Warning
- Orange: Error
- Red: System temperature error (see *INFO > System status*)

Fan icon

Icon color shows the fan noise status:

- Grey: About to increase above 20 dBa.
- Orange: Higher than 20 dBa.

USB icon

Icon color shows USB memory status:

- White: Ready
- Gray: Read only
- Orange: Not usable

Camera and Lock icons

Lock: Appears only if camera is locked.

Camera: Grab is active.

GEN icon

Visible if Genlock is activated via *MENU > System > Genlock*. Icon color shows the Genlock status.

- *White*: Genlock active
- *Orange*: Genlock signal missing

RET icon

Return In activated on EVF/Mon and/or SDI. Icon color shows the status:

- *White*: RET active
- *Orange*: RET signal missing

Audio meters

Show current level of camera audio channel signals. If audio is disabled, an icon appears.

Codec/Resolution

Currently active ProRes codec and recording resolution.

Camera status

STBY: Ready for recording.

REC: Recording.

ERASE: Erasing a CFast 2.0 card. Active erasure disables recording.

None: Card missing/invalid/full.

Card status

Remaining capacity of CFast 2.0 card, at current FPS and codec combination in real time.

When card capacity is less than 2 minutes, capacity values starts flashing.

Recording status

REEL: Current reel of active recording medium.

CLIP: Current clip of current reel.

DUR: Duration of currently recorded clip (during REC) or last recorded clip (during STBY).

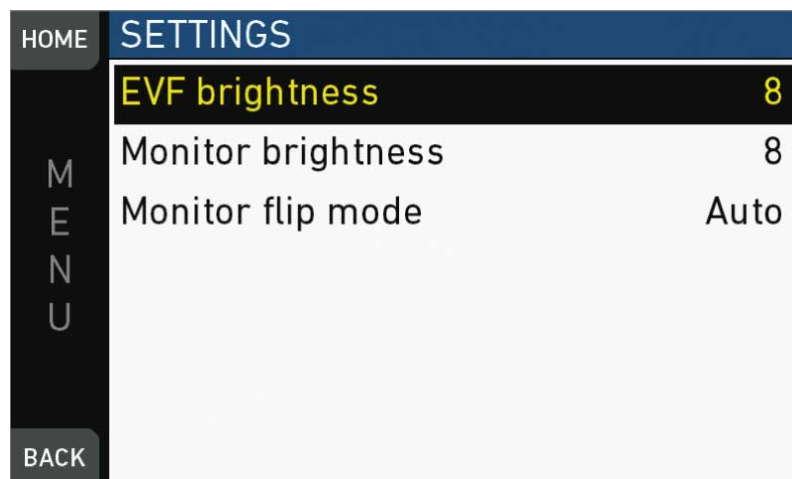

BAT 1 & 2

Current battery supply levels.

10.10.2 Adjusting the monitor brightness

1. Open the home screen.
2. Via jogwheel (1), open *MENU > Monitoring > EVF/Monitor > Settings*.

3. Scroll to *Monitor brightness*.
4. Press the jogwheel.
5. Adjust the brightness by scrolling to the required value: 1 (= minimum) to 10 (= maximum).
6. Press *HOME*.

11 Web remote

ALEXA Mini has a web remote function for full remote control of the camera with a web browser*. It requires a connection to the camera via WiFi or with cable KC-153-S.

To enable WiFi via the MVF-1, navigate to *MENU>System*. Without the MVF-1, the webremote must be used via a cabled connection.

Open a web browser* and enter the URL: `http://mini-xxxxx.local` (replace xxxxx with the 5-digit serial number of your camera).

MAIN, PLAY, REC INFO and USER

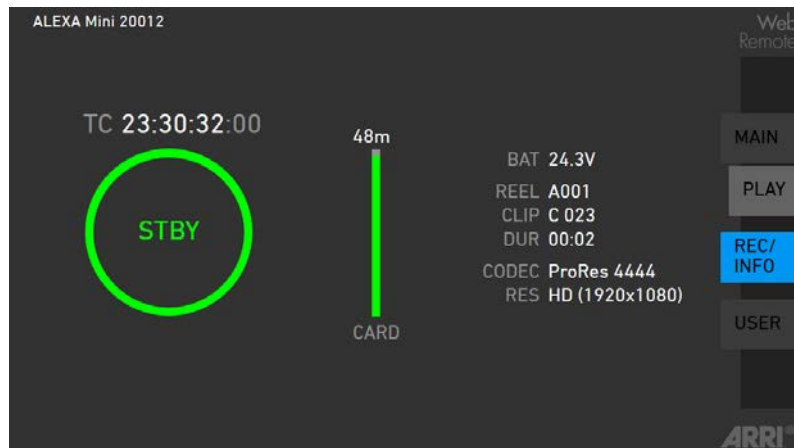

Web remote is divided into the following four sections:

MAIN: Contains the same UI as the camera monitor (no live screen). Click/tap the screen button tabs to enter a screen/trigger a function. Menu items can be clicked/tapped directly.

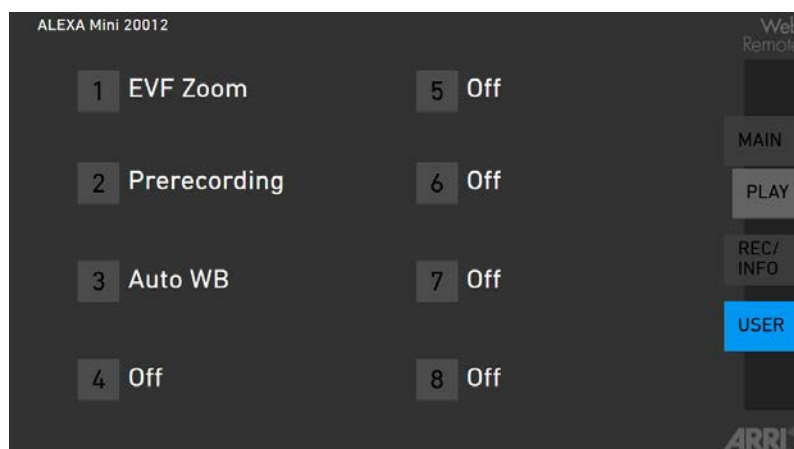

PLAY: Starts playback on the camera. Provides the same controls as the MVF-1, but no video signal.

REC INFO: Contains info on the main recording relevant parameters, plus a **REC** button. Click the big circle icon to start/stop recording.

Note: Rec status may respond with a little delay depending on network speed.

USER: Shows configuration of user buttons and allows to trigger them. Press number icons to trigger user buttons.

* tested with: Google Chrome 39 and Mozilla Firefox 34.

12 Camera preparation

12.1 Adjusting the MVF-1

1. Place the camera bottom-up.
2. Slightly loosen the clamp (1) to move the MVF-1 (2) left/right and up/down.
3. Unclamp the hinge (3) to swivel the MVF-1 horizontally.
4. Close all clamps (1, 3) when the MVF-1 is in the desired position (2).

12.2 Mounting to a bridge plate

To mount the camera to a bridge plate, you need the following accessories and tools:

Step	Accessory	Mount to	Tool
1	MAP-2	camera (bottom)	3.0 mm Allen key
2	BAP-4	MAP-2	Flat screwdriver (no coin!)
3	BP-8	BAP-4	

Step 1: Mounting the MAP-2 to the camera

1. Place the camera bottom-up.
2. Place the MAP-2 (2) exactly above the mounting points (3) of the camera.
3. With the Allen key, attach the screws (1) to the camera and tighten.

NOTICE

Always ensure a proper lock.

Step 2: Mounting the BAP-4 to the MAP-2

1. Place the BAP-4 (2) exactly above the mounting points (3) of the MAP-2 (2).
2. With a flat screwdriver, attach the screws (1) to the MAP-2 and tighten.

NOTICE

Always use a flat screwdriver to connect the BAP-4 to the MAP-2. Never use a coin. A coin does not deliver enough force to ensure a proper lock.

Step 3: Mounting the BP-8 to the BAP-4

1. Place the BP-8 (2) exactly above the mounting points (3) of the BAP-4 (2).
2. With a flat screwdriver, attach the screws (1) to the BAP-4 and tighten.

NOTICE

Always use a flat screwdriver to connect the BP-8 to the BAP-4. Never use a coin. A coin does not deliver enough force to ensure a proper lock.

13 Assembly and retrofits

NOTICE

To avoid damage while assembling and retrofitting, always place the camera on a padded, firm, flat and level surface.

Work on an unpowered camera only.

13.1 MVF-1 and EVF cable

Connecting the EVF cable to the camera

Note: Use original ALEXA Mini-EVF cables only.

- ▶ Connect the EVF cable (1) to the camera (16-pin LEMO connector (2) on the I/O panel).

Connecting the EVF cable to the MVF-1

1. Switch off; interrupt the power supply.
Note: Use original ALEXA Mini-EVF cables only.
2. With your fingers, unscrew and remove the MVF-1's lid (1).
3. Connect the cable (2) to the EVF port.
4. Reattach the lid (1).

13.2 Camera handle

Tool needed

- 3.0 mm Allen key

1. Place the camera handle (1) exactly above the mounting points (3) of the camera.
2. With the Allen key, attach the screws (2) to the camera and tighten.

NOTICE

Always ensure a proper lock.

13.3 Antenna

1. With your fingers, thread the antenna for white radio (1) onto the camera.
2. **To unmount:** Unthread the antenna (1) with your fingers.

13.4 Changing a lens mount

⚠ WARNING!

High voltage! Risk of electric shock and fire!

Short circuits may entail lethal injury and damage!

Use original ALEXA lens mounts only.

Before each lens mount change, always switch the camera off and disconnect all power sources.

Changing the lens mount while the camera is powered may permanently damage the camera and lens mount.

Protect sensor and electrical system: Always store the camera with a lens mount properly installed and capped.

Immediately replace each lens mount after removal.

Change lens mounts in dust-free environment only.

NOTICE

After each lens mount change, always check the back focus of the camera.

Have the back focus always corrected by properly skilled personnel.

Back focus correction requires special tools and training that meet ARRI guidelines.

For all back focus issues, contact a qualified ARRI Service Center.

Tools and provisions needed

- 3 mm Allen key
- Switch the camera off
- Disconnect all power sources
- Properly cap, disconnect, and store the lens

Deinstallation (here: a PL mount)

1. Perform task with care to protect optical surfaces.
2. Crosswise, loosen all four screws (2) with an Allen key.
3. Carefully remove the mount (1).
4. Store the mount in a case for dust protection.

Note: To protect the sensor (3), immediately install another original ALEXA lens mount.

Installation (here: a PL mount)**⚠ WARNING!****Condensation! Risk of electric shock and damage!**

Humidity may ingress due to misinstalled lens mounts!

When installing a lens mount, always align and attach properly; never apply force.

Hand-tighten all screws crosswise before final tightening.

Always tighten crosswise with the prescribed tool.

1. Properly align the two guiding pins (1) for correct lens mount fit (2).

Note: Never apply force, align the guiding pins instead.

2. Crosswise, hand-tighten all four screws (1).
3. Only then, tighten all screws crosswise with the Allen key.

Note: Always store the camera with a lens mount properly installed and capped.

14 Licensing

Upon initial release, ALEXA Mini has all features included in the SUP. The licensing menu is not available on ALEXA Mini. For SUPs beyond 2.5, please check the corresponding release notes and camera manual.

15 Appendix

15.1 Dimensions and weight (with titanium PL mount)

Length	185 mm
Height	140 mm
Width	125 mm
Weight	2.3 kg

15.2 Declarations of conformity

EC Declaration of Conformity

The product ALEXA Mini conforms with the specifications of following European directives:

- Directive 2014/30/EU of the European parliament and the Council of 26 February 2014 on the harmonization of the laws of the Member States relating to electromagnetic compatibility
- Directive 1999/5/EC of the European Parliament and the Council of 9 March 1999 on radio equipment and telecommunications terminal equipment and the mutual recognition of their conformity
- Directive 2011/65/EU of the European Parliament and the Council of 8 June 2012 on the restriction of the use of certain hazardous substances in electrical and electronic equipment

FCC Compliance Statement

Class A Statement: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

Note: This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Industry Canada Compliance Statement

Complies with the Canadian ICES-003 Class A specifications.

Cet appareil numérique de la Classe A est conforme à la norme NMB-003 du Canada.

This device complies with RSS-210 of Industry Canada.

Cet appareil est conforme à CNR-210 d' Industrie Canada.

This Class A device meets all the requirements of the Canadian interference-causing equipment regulations

Cet appareil numérique de la Classe A respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.
