

Setup Guide — SW HDMI Series

This guide provides basic instructions for setting up the Extron SW HDMI Series switchers.

IMPORTANT:
Refer to www.extron.com for the complete user manual and installation instructions before connecting the product to the power source.

Installation

Step 1 — Mount the unit (optional)

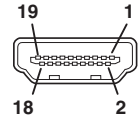

Turn off or disconnect all equipment power sources and mount the switcher as desired.

Step 2 — Connect inputs

Connect source devices to one or more HDMI input connectors. Only single link HDMI signals are supported.

Step 3 — Connect an output

Connect a display device to the HDMI output connector.

Step 4 — Connect RS-232 (optional)

Connect three wires from pins 2, 3, and 5 of the RS-232 cable's female 9-pin HD connector to pins 1, 2, and 3 of one of the provided 5-pin captive screw plugs. Insert the plug into the Remote/Auto-SW shared connector, and connect the cable to the computer's serial port. (See the illustration below.)

RS-232 Port

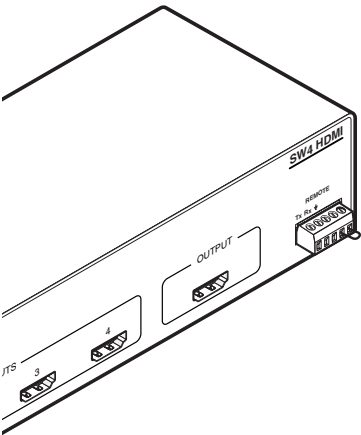

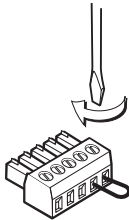

For explanations of all SIS commands, refer to chapter 4 of the *SW HDMI Series User's Manual*.

(Continued on reverse side)

Setup Guide — SW HDMI Series, cont'd

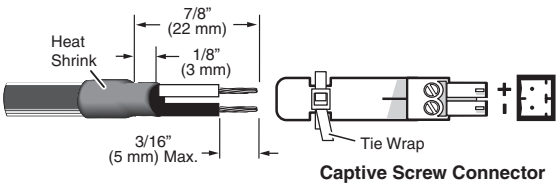

Step 5 — Enable auto switching (optional)

Use a jumper wire to connect pins 4 and 5 of one of the provided 5-pin captive screw plugs. Insert the plug into the Remote/Auto-SW shared connector. See the illustrations below and at right.

Step 6 — Wire power connector

If using an Extron external power supply that is not already wired, attach the provided 2-pin captive screw connector to the power supply as shown at right.

Step 7 — Power on

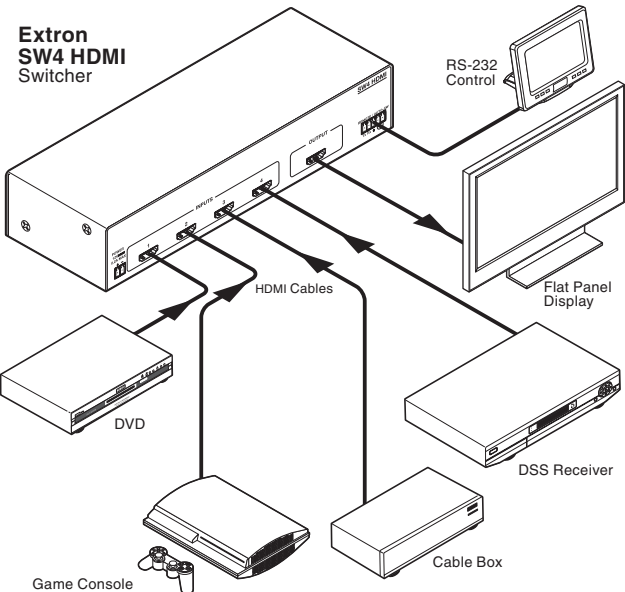

- a. Power on the output device.
- b. Apply power to the SW HDMI switcher.
- c. Power on the input devices.

Application diagram

The figure at right shows an example of how an SW4 HDMI switcher can be connected.

NOTE

HDCP compliant sources require the use of HDCP compliant displays. Refer to the user's manual for your source or display device for information on its HDCP compliance.
