

Genus Elite Matte Box Kit

The Elite Matte Box Kit is a versatile production matte box. The GE-MK/1 features two filter stages. The front filter tray is fixed and the rear filter tray rotates 360 degrees, making it suitable for polarising and graduated filters. The rotating filter tray can be locked to a set position.

The GE-MK/1 Elite Matte Box Kit comes with two GEM-FTPS combination 4x4 / 4x5.65 filter trays. Other optional filter trays are available: GEM-FTPSS 5.65x5.65 and GEM-FTPVC combination 4x5.65 / 5x5.

A wide range of optional Clamp-On Adaptor Rings are available for the Elite Matte Box, ranging from 80mm to 121mm, so you can easily match it to the lenses of your choice.

This matte box package kit comes with the GEM-QRBSB 15mm lightweight standard support bracket. Other optional support brackets are the GEM-SBSB 15mm studio standard and GEM-SSB 19mm Studio rods bracket.

To maximise light control the Elite matte Box features both a GEM-FF foldable French Flag and GEM-BD Side Flags, which are supplied in this package.

The Elite Matte Box Kit is the perfect companion to the new generation of larger sensor cameras, as well as broadcast and film cameras with various lenses.
