

Professional Adaptor Bars System

The Genus Professional Adaptor Bars System (GMB/P) is specifically designed to cater to the ENG camera market. Clicking snugly and securely onto a Sony V-mount plate or its equivalent, the GMB/P serves the dual function of a bar system as well as a camera adaptor plate. The GMB/P comes supplied with 215mm support bars which can be removed when not in use, leaving the plate attached to the underside of the camera.

Features

- Non-slip rubber strips on the backplate prevents movement and damage to your camcorder
- V-mount lock slots securely onto a V-mount tripod plate
- Variable positioning with vertical and horizontal brace for perfect alignment
- Retracts to a compact size when not in use
- Easy-grip turn knobs that tighten and loosen gently
- Spring-loaded release catch for the backplate
- Bars will fit any 15mm matte box support bar system
