Software Guide

Pages

Your monitor has multiple preset pages that you can scroll between in the simple swipe of your joystick. Think of it like you have a line of rack monitors all with different features and settings activated, swiping your joystick would be like walking down the line of monitors.

Toolbox

Click Joystick on any page to access your monitors Toolbox
Select new tool to add with + Icon by clicking joystick
Once tool is added click it to enable/ disable
Slide joystick to the right tool selected name to adjust tools attributes
