

XAircraft X650 v8 KIT 2012 model

Specifications:

Brand	XAircraft
Product type	RC helicopter
Release date	18.05.2012
Application range	Professional use outdoor
Motor Type	Electric motor
Rotor Type	Octocopter
Color	Black
Material	ABS plastic
Payload	1KG
Guarantee	1 year

KIT includes:

Helicopter main body

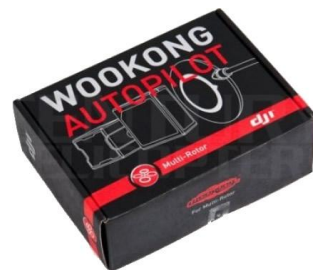

8pcs rotors

Camera base with Pan Tilt remote function

FC1212-P Flight controller

Wookong Auto Pilot system with Position & altitude hold - GPS Control

Cyclops Easy OSD V1.5 GPS module 10Hz

Dragonfly FPV TS351 & RC305
5.8GHZ Wireless Composite Video system

2pcs Dragon 351P Lipoly batteries 5850mAh - 30min Flying time each &
Lipo charging bag.

Charger iMAX B6AC for
up to 6cells Lipoly batteries
with cell balancer.

Futaba 7C 2.4GHZ Remote Controller with receiver.

Safety Precautions:

- Each individual lithium polymer cell has a nominal voltage of **3.7 volts**. Fully charged voltage is **4.2 volts**. It is **extremely important** that a LiPo battery cell not be discharged below 3.0 volts or charged beyond 4.2 volts. Doing so will most certainly damage the battery!
- Always let your LiPo batteries cool to ambient temperature after a flight before charging.
- Always charge your batteries on a solid non-flammable surface in a well ventilated area.
- Always check your LiPo batteries for any damage after a crash.
- Never leave your batteries charging unattended.
